What we are

An Amazon Alexa Skill

Information delivery with the NASDAQ API and personalized recommendations with TensorFlow machine learning models.

“Alexa, open NASDAQ.”

What we do

Four key NEXA skills

Price

"Alexa, ask NASDAQ for the price of Amazon."

Low & High

"Alexa, ask NASDAQ what's the low price of Snapchat?"

Personalized Recommendations

"Alexa, ask NASDAQ for a portfolio update."

Portfolio Updates

"Alexa, ask NASDAQ to give me some recommended stocks."

Stock Updates

Pulling from the NASDAQ API, Nexa generates daily stock updates for any publicly traded company.

“Alexa, ask NASDAQ,
‘What is the price
of NASDAQ?’ “

“The price of NASDAQ
stock is \$36.39”

Low & High

Giving comprehensive stock overview with low and high capabilities for each stock

“NASDAQ, what is the high of Google?”

Portfolio Updates

“Alexa, ask NASDAQ give me my portfolio update”

A black smart speaker sits on a round wooden coffee table. In the background, there is a sofa with patterned cushions and a red lamp. A book with a colorful cover is on the table in the foreground.

Stock Recommendations

“Alexa, ask NASDAQ for some
stock recommendations”

“Based on your portfolio and
current market performance,
we recommend investing in
Square, AMD, and Tesla.”

What to expect

Future features

- 1 Stock news updates and sentiment analysis using Natural Language Processing
- 2 Bullish and bearish stock predictions
- 3 Real-time stock price alerts, reminders, and notifications
